1 Introduction

GoDroid is the Android 4.4 based operating system running on TIGER Board for the GoWarrior platform. This is GoDroid 1.1 release.

You can get all components of this release by Git. The following table lists the independent components included in this release.

Component	Description
GoDroid Image (for SD card)	A pre-built image file of GoDroid for TIGER Board.

Table 1. GoDroid Component List

2 Requirements

GoDroid 1.1 requires TIGER Board v1.1.

3 What's New in This Release

- Installing to an extra MicroSD card

GoDroid is installed to an extra MicroSD card, and will boot up when the board is powered up with the card plugged in.

4 Installation and Usage

TIGER Board comes out of the box with GoDroid pre-installed, you can start GoDroid directly just by powering up the board.

To update GoDroid to the latest version, or if you have customized GoDroid, you can install the system with the image file using a MicroSD card. For more information about installing GoDroid, refer to *GoDroid Installation*.

5 Product Documentation

The following documentation is included with this release:

No.	Document Name	Description
1	GoDroid Release Notes v1.1	This document.
2	GoDroid Datasheet v1.1	Specifies the detailed features in this release.
3	Getting Started with GoDroid v1.1	Introduces how to start GoDroid.
4	GoDroid Developer Guide v1.1	Describes how to compile GoDroid and develop GoDroid applications.
